- Successfully expedited the availability of new components for use across the organization, enhancing productivity and feature implementation across multiple teams.
- Collaborated with UX/UI designers to enhance user experience.
- Provided engineering support to other teams such as automating Sonarqube integration to CircleCI, and working on AWS Lambda's serverless projects.
- Received the CXA Star Award for going above & beyond the daily responsibilities of role.
- Cisco CPXE CX Cloud Hackathon 3rd place Finalist for identifying 3rd party application integration.

Ledgerfire

SOFTWARE ENGINEER

Nov. 2019 - Aug. 2021

• Led the development of an internal component library to supplement Material-UI,

increasing development speed and improving UI consistency.

- Worked with UX/UI developer to design, prototype, and build wireframes for applications utilizing React, and Redux.
- Collaborated with CEO to develop product strategy and implement proprietary formulas.
- Implemented server side connection to Plaid API library, and client authorization flow.

• Architected back end to calculate user financial data and maintain REST APIs with NodeJS and Express.

 Organized and created stand-up meetings for the team, managed JIRA tickets, and updated board members on progress.

Poppy Bank

SENIOR NEW ACCOUNTS

Nov. 2017 - Nov. 2019

• Built new account software generation utilizing Python/Flask for backend process, and React for Frontend user input. Utilized software to reduce new account generation by 80%.

• Communicated with customers by asking questions, building rapport, and maintain exceptional customer service.

• Brought in new business to meet quarterly branch goals and implemented retention techniques.

• Provided coaching, training, and support to operational branch duties and new team members.
